13<sup>th</sup> September 2018

Dear Mark,

**Thank you!** We are extremely grateful for your multiple kind donations of computer tablets and a television. They have been much used and much enjoyed by the children, not to mention the fact that they have revolutionised their education. Thanks to you they are all now able to use technology that would be otherwise inaccessible to them, a skill which will hopefully give them more opportunities to thrive in life.

*There are many terrifying realities that force countless children onto the streets: domestic violence, being orphaned or abandoned, or simply belonging to dysfunctional families. For most there is no way back.*

Task Brasil's socio-educational project, Crescer, provides out-of-school workshops in a variety of subjects including English, IT, art, music, income-generating skills, sport, communication and introductory finance. Project Stepping Stone provides advice and support for our past residents and their families, so that they continue attending school, receive healthcare treatment and have access to further education and vocational training. The tablets you donated are helping us to work towards these goals.

Task Brasil works to support the families to live in harmony, to ensure that their children build the firm foundations needed to lead independent and fulfilling lives, avoiding a return to living on the streets.

We would like to express our heartfelt thanks to you, yet again, for your brilliant support and we hope you keep in touch with us.

Best Wishes
