

*St. Boniface School*  
*...making a world of*  
*difference*

September 28, 2018

To Whom It May Concern:

St. Boniface School has been the grateful recipient of a \$50,000 grant from School New Technology Initiative for the purpose of upgrading the technology used in the school. This has truly been a blessing since other sources have provided funds for student technology, but those funds are restricted and cannot be used to upgrade teacher or classroom technological improvements.

Because of the School New Technology Initiative, we have been able to purchase a much-needed new server for the building. We have also replaced teacher laptops, which were at least ten years old. We purchased charging station storage carts to accommodate the Chrome books students have been using for some time. Formerly, we had rigged old file cabinets to serve for storage and charging; the tangled web of wires was rather daunting!

All classrooms now have short-throw smart boards, allowing teachers to take advantage of curriculum resources becoming increasingly more available to support interactive learning. The students love it!

Without School New Technology Initiative's support, these improvements would be well beyond our reach. We could only hope to implement one a year at best. School New Technology Initiative has made a significant contribution to learning at St. Boniface!

Gratefully,

**Sr. Miriam Kaeser**
